SPECIALIZED DISCLOSURE REPORT

Embecta Corp.
(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

001-41186
(Commission
File Number)

87-1583942
(IRS Employer
Identification No.)

300 Kimball Drive, Suite 300
Parsippany, New Jersey
(Address of principal executive offices)

07054
(Zip Code)

Shaun Curtis
(862) 401-0000

(Name and telephone number, including area code, of the person to contact in connection with this report.)

Check the appropriate box to indicate the rule pursuant to which this form is being filed, and provide the period to which the information in this form applies:

- Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2025.
-
-

Section 1 – Conflict Minerals Disclosure

Item 1.01 Conflict Minerals Disclosure and Report

As contemplated by Rule 13p-1 under the Securities Exchange Act of 1934, as amended, and Form SD, a Conflict Minerals Report is provided as an Exhibit to this Form SD and is available at the following Internet website: <https://investors.embecta.com/financials-filings/sec-filings>. The information contained on our website is not incorporated by reference into this Form SD or our Conflict Minerals Report and should not be considered part of this Form SD or the Conflict Minerals Report.

Information concerning tin, tantalum, tungsten, or gold from recycled or scrap sources that may be contained in our in-scope products is included in the Conflict Minerals Report and is incorporated in this Form SD by reference.

Item 1.02 Exhibit

The Conflict Minerals Report contemplated by Item 1.01 is filed as Exhibit 1.01 to this Form SD.

Section 2 – Exhibits

Item 2.01 Exhibits

Exhibit 1.01 – Conflict Minerals Report for the calendar year ended December 31, 2025.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

Embecta Corp.
(Registrant)

By: /s/ Shaun Curtis
Name: Shaun Curtis
Title: SVP, Global Manufacturing and Supply Chain

May 22, 2026

EXHIBIT INDEX

Exhibit	Description
1.01	Conflict Minerals Report for the calendar year ended December 31, 2025.

Conflict Minerals Report

Embecta Corp. has included this Conflict Minerals Report as an exhibit to its Form SD for 2025, as contemplated by Rule 13p-1 under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), and Form SD (collectively, the "Conflict Minerals Rule"). The date of filing of this Conflict Minerals Report is May 22, 2026.

The term "Embecta," "we," "us" and "our" refer to Embecta Corp. and its consolidated subsidiaries for or at the end of 2025. As used herein and consistent with the Conflict Minerals Rule, "Conflict Minerals" or "3TG" are columbite-tantalite (coltan), cassiterite, gold, wolframite and the derivatives tantalum, tin, and tungsten, without regard to the location of origin of the minerals or derivative metals. The "Conflict Affected Region" is defined as the Democratic Republic of the Congo and its adjacent countries, which include Angola, Burundi, Central African Republic, the Republic of the Congo, Rwanda, South Sudan, Tanzania, Uganda, and Zambia.

Overview

Embecta, formerly part of Becton, Dickinson and Company, is a global company that is advancing its 100-year legacy in insulin delivery to become a broad-based medical supplies company, helping to improve lives through innovative solutions, partnerships, and the passion of approximately 2,000 employees around the globe. Embecta is subject to the Conflict Minerals Rule because, for 2025, certain of the raw materials and components contained in some of the products that we manufactured or contracted to manufacture contained 3TG that were necessary to the functionality or production of the products. Many of the raw materials and components contained in our products do not contain any 3TG.

We do not directly source 3TG from mines, smelters, or refiners, and we believe that we are many levels removed from these market participants.

Reasonable Country of Origin Inquiry; Smelter and Refiner and Country of Origin Information

As required by the Conflict Minerals Rule, for 2025, a "reasonable country of origin inquiry" was conducted. The outreach included 6 suppliers (the "Suppliers") that were identified through internal scoping processes as having provided, or that we believe may have provided, us with raw materials or components that contain 3TG. The number of Suppliers included in the 2025 outreach reflected Embecta's 2025 internal scoping process, including changes in suppliers, products, components, and/or raw materials determined to be in scope for purposes of the Conflict Minerals Rule. Suppliers representing 100% of Embecta's in-scope spend for 2025 responded to Embecta's reasonable country of origin inquiry.

For 2025, our Suppliers identified 329 smelters and refiners as described in the Table 1. Smelter summary. The number of identified smelters and refiners may vary from year to year due to changes in supplier responses, supplier sourcing

practices, CMRT reporting scope, product or component sourcing. Smelters and refiners are sorted by mineral and risk level, as potentially having processed the necessary 3TG contained in our in-scope products. The names of the identified smelters and refiners are listed in Appendix A. The origin of only a portion (if any) of the necessary Conflict Minerals contained in each of our in-scope products was determined.

Table 1. Smelter Summary

	Covered Country Sourced	Non-Covered Countries Only		Other Source Country				Total Smelters
Metal	RMAP Conformant	RMAP Conformant	100% Recycled or Scrap	RMAP Conformant	RMAP Active	Non-Conformant	On Smelter Look-up Tab Only	
Gold	1	88	0	0	5	19	63	176
Tantalum	15	17	0	0	1	0	2	35
Tin	8	35	2	4	2	10	7	68
Tungsten	10	23	0	0	1	5	11	50
Total	34	163	2	4	9	34	83	329

Based on the results of our reasonable country of origin inquiry, due diligence was conducted for 2025. These due diligence efforts are discussed later in this Conflict Minerals Report.

Conclusion Statement

Based on the information obtained through our reasonable country of origin inquiry and due diligence efforts, none of the necessary 3TG contained in our in-scope products were determined by Embecta to directly or indirectly finance or benefit armed groups in the Conflict Affected Region. However, Embecta did not conclude that any of our products were "DRC conflict free." The terms "armed group" and "DRC conflict free" have the meanings contained in the Conflict Minerals Rule.

Due Diligence Program

Design Framework

The due diligence measures relating to 3TG were designed to conform with the criteria set forth in the OECD Guidance, including the Supplement on Tin, Tantalum and Tungsten and the Supplement on Gold (Third Edition).

Selected Elements of Our Due Diligence Program

The OECD Guidance provides a framework for responsible supply chain due diligence for minerals from conflict-affected and high-risk areas. Selected elements of our due diligence program are discussed below. However, these do not represent all the elements of our program to ensure that the 3TG contained in our products is responsibly sourced.

Conflict Minerals Team:

We have a Conflict Minerals Steering Team (the "Steering Team") responsible for overseeing compliance. The Steering Team engages with functional leadership around progress and collaborating with necessary third-party resources. The Steering Team consists of representatives from compliance, sustainability, and procurement.

Internal and External Communication of Conflict Minerals Program and Training:

Applicable suppliers and subcontractors are provided with information on the Conflict Minerals Rule, our commitment to compliance with the Rule and/or our sourcing expectations. This is done in writing, through meetings and other live communications and/or through contractual requirements.

Embeta utilized a third party who is a vendor member of the Responsible Minerals Initiative ("RMI") to support its reasonable country of origin inquiry and supplier outreach.

Data Storage and Retention:

We keep business records that relate to our Conflict Minerals program and maintain them for 5 years.

Contractual Compliance Requirements:

Embeta's Expectations for Suppliers, which contains our supplier compliance requirements relating to many different subject areas, requires suppliers to provide information to support our compliance efforts under the Conflict Minerals Rule.

Grievance Mechanisms:

We maintain grievance mechanisms that allow employees, suppliers, and other interested parties to report alleged violations related to Conflict Minerals and other related policies. Information about these reporting channels is publicly available. Any grievances received are communicated to the Steering Team. Employees, suppliers, and other interested parties can report conduct inconsistent with the Expectations for Suppliers through our Global Ethics Help

Line at 1-833-600-1032. We review every report submitted through this channel in accordance with our internal procedures.

Collection, Assessment, and Internal Reporting of Supply Chain Information:

Suppliers that Embecta determines to be in-scope are requested to complete a Conflict Minerals Reporting Template ("CMRT"), which contains questions on the inclusion and source of 3TG in the materials they supplied to us, as well as their compliance activities. For 2025, Embecta sent requests to 6 Suppliers to provide us with a completed CMRT. Follow-up emails or phone calls were made to Suppliers that did not provide a response within a specified time frame. If a Supplier still did not respond to the request or refused to respond, this information was forwarded to Global Procurement or local buyers at manufacturing plants to support the escalation process.

Upon receipt of a CMRT from a Supplier, the response was processed through a Supplier Response Analysis process. The completed responses received from Suppliers were reviewed against "red flag" criteria and checked for errors and inaccuracies. Additionally, submitted CMRTs were reviewed for certain errors and inaccuracies, and follow-up was conducted with these Suppliers, if applicable.

Smelters and refiners identified to us by the Suppliers were reviewed against those contained on the Smelter Look-up tab of the CMRT and the RMI smelter database, which includes information published by RMI, the Responsible Jewelry Council and the London Bullion Market Association. To the extent that a completed response identified a smelter or refiner, that information was also reviewed against the lists of conformant and active (or equivalent) smelters and refiners published by the RMI as of April 17, 2026.

To the extent that a smelter or refiner identified by a Supplier was not listed as conformant or the equivalent by the RMI, publicly available information was consulted to attempt to determine whether the smelter or refiner obtained 3TG from sources that directly or indirectly financed or benefitted armed groups in the Conflict Affected Region. See "Reasonable Country of Origin Inquiry; Smelter and Refiner and Country of Origin Information" and Appendix A for further information on the smelters and refiners identified by the Suppliers.

Based on the information furnished by the Suppliers and other information known to us, the risk of adverse impacts was assessed. The findings of the supply chain risk assessment were reported to the Steering Team. In particular, smelters and refiners identified as not RMAP Conformant or Active, or listed only on the CMRT Smelter Look-up tab, were reviewed as part of Embecta's risk assessment process.

Any non-compliances with our expectations for Suppliers or findings involving higher levels of risk are prioritized for appropriate action, determined on a case-by-case basis. These actions may include additional information gathering and risk assessment, direct engagement with suppliers to agree on mitigation plans, or monitoring. Based on the information obtained through its due diligence process for 2025, Embecta did not identify any smelter or refiner that it

determined to be directly or indirectly financing or benefiting armed groups in the Conflict Affected Region.

Use of Independent Third-party Audits to Assess Smelter and Refiner Due Diligence:

As part of our due diligence efforts, we rely on information published by RMI regarding independent third-party audits of smelters and refiners. This information is used to assess whether a smelter or refiner meets the criteria to be considered RMI Responsible Minerals Assurance Process ("RMAP") Conformant.

Report on Supply Chain Due Diligence:

We file a Form SD and a Conflict Minerals Report with the Securities and Exchange Commission and make these documents available on our website.

Product Information

In-scope products for 2025 included a range of insulin delivery devices (e.g. syringes and pen-needles). Not all products in each category were in-scope, as not all contained necessary 3TG or were manufactured or contracted for manufacture by us.

For 2025, despite Embecta's reasonable country of origin inquiry and due diligence efforts, at least a portion of the smelters and refiners and countries of origin of the necessary 3TG contained in each of our in-scope products was undeterminable. Identified smelters and refiners and country of origin information are described under "Reasonable Country of Origin Inquiry; Smelter and Refiner and Country of Origin Information" and on Appendix A.

Appendix A

In connection with the reasonable country of origin inquiry and due diligence, as applicable, the Suppliers identified to us the smelters and refiners listed below, sorted by mineral and risk level, as potentially having processed the necessary 3TG contained in our in-scope products in 2025.

Capitalized terms used and not otherwise defined in this Appendix have the meanings indicated in our Conflict Minerals Report.

Smelters and Refiners

In connection with the reasonable country of origin inquiry and due diligence, as applicable, the Suppliers identified to us the smelters and refiners listed below, sorted by mineral and risk level, as potentially having processed the necessary 3TG contained in our in-scope products in 2025.

We note the following in connection with the information in Appendix A:

(a) The smelters and refiners listed in the table were identified by the Suppliers as being part of our 2025 supply chain. Some of the Suppliers may have reported smelters and refiners that were not in our supply chain (i) since they reported at a “company level,” meaning that they reported to us the 3TG contained in all of their products, not just the products that they sold to us, or (ii) due to over-inclusiveness in the information received from their suppliers. In addition, the smelters and refiners reflected above may not be all of the smelters and refiners in our 2025 supply chain, since many of the Suppliers were unable to identify all of the smelters and refiners used to process the necessary 3TG contained in our in-scope products.

(b) All information in the table is as of April 28, 2026.

(c) “Conformant” means that the smelter or refiner has successfully completed an assessment against the applicable RMAP standard or an equivalent cross-recognized assessment. The included smelters and refiners were not necessarily Conformant for all or part of 2025 and may not continue to be Conformant for any future period.

(d) “Active” means that the smelter or refiner has committed to undergo an RMAP assessment, completed the relevant documents, and scheduled the on-site assessment. These entities may be in the pre-assessment, assessment, or corrective-action phases of the assessment.

(e) "On Smelter Look-up Tab Only" means the smelter or refiner is not listed as "Conformant" or "Active." The table only includes entities that were listed as smelters or refiners by the RMI on the Conflict Minerals Reporting Template.

(f) The compliance status reflected in the table is based solely on information made publicly available by the RMI, without independent verification by us.

(g) Country location refers to the location of the smelter or refiner.

Country of Origin Information

The countries of origin of the newly mined 3TG processed by the Conformant smelters and refiners listed above may have included countries in each of the categories listed below, as well as other countries. The specific countries of origin of the 3TG in our products were undeterminable. Accordingly, the 3TG in our products may not have originated in any country listed below.

The countries below are sorted by risk level. See "Reasonable Country of Origin Inquiry; Smelter and Refiner and Country of Origin Information" for additional origin information.

Known Countries from which Conformant Gold Refiners Source:

Countries that are not identified as conflict regions or plausible areas of smuggling or export of from these regions of 3TG or which are identified as low risk: Benin, Brazil, Canada, Chile, Guyana, Papua New Guinea, Philippines, South Africa, Sweden, Uzbekistan, and Japan

Countries identified by smelters and refiners as Conflict-Affected and High-Risk: Brazil, Colombia, Nicaragua, Niger, Peru, South Africa, Tanzania, and Zimbabwe

The Conflict Affected Region: Tanzania

Known Countries from which Conformant Tantalum Smelters Source:

Countries that are not identified as conflict regions or plausible areas of smuggling or export of from these regions of 3TG or which are identified as low risk: Australia, Brazil, China, France, Liberia, Madagascar, Mozambique, Nigeria, Sierra Leone, Spain, and Thailand

Countries identified by smelters and refiners as high risk: Brazil, Burundi, Congo, Democratic Republic of the, Ethiopia, Mozambique, Nigeria, Rwanda, and Zimbabwe

The Conflict Affected Region: Rwanda, Congo, Democratic Republic of the, and Burundi

Known Countries from which Conformant Tin Smelters Source:

Countries that are not identified as conflict regions or plausible areas of smuggling or export of from these regions of 3TG or which are identified as low risk: Australia, Bolivia, Brazil, China, Indonesia, Laos, Malaysia, Mongolia, Myanmar, Namibia, Peru, Portugal, Spain, and Vietnam

Countries identified by smelters and refiners as high risk: Bolivia, Brazil, Burundi, Congo, Democratic Republic of the, Myanmar, Nigeria, Rwanda, Tanzania, Thailand, Zambia, and Uganda

The Conflict Affected Region: Burundi, Congo, Democratic Republic of the, Rwanda, Tanzania, and Uganda

Known Countries from which Conformant Tungsten Smelters Source:

Countries that are not identified as conflict regions or plausible areas of smuggling or export of from these regions of 3TG or which are identified as low risk: Australia, Bolivia, Brazil, China, India, Malaysia, Mongolia, Portugal, Spain, Thailand, United Kingdom, United States of America, and Vietnam

Countries identified by smelters and refiners as high risk: Rwanda, Bolivia, Burundi, Congo, Democratic Republic of the, Myanmar, Russia, Tanzania, and Vietnam

The Conflict Affected Region: Burundi, Congo, Democratic Republic of the, Rwanda, and Tanzania
